

# COMPANY PROFILE

Electrical Contracting | Mechanical Contracting | Water Treatment Solutions

# COMPANY OVERVIEW

[Your Company Name] is a dynamic and innovative contracting firm offering comprehensive services in electrical, mechanical, and water treatment sectors. Despite being a new company, we have established strategic partnerships with industry veterans to deliver exceptional quality and expertise. Our commitment to safety, innovation, and customer satisfaction drives us to execute every project with precision and integrity.

## Mission

To provide top-tier contracting and engineering services, driven by quality, safety, and innovation.

## Vision

To become a leading multidisciplinary contracting firm, known for delivering excellence and fostering sustainable growth.

## Core Values

Integrity, Quality, Innovation, Safety, and Client Satisfaction

# STRATEGIC PARTNERSHIPS

## Bandar Abdul Hadi Al Shamri Contracting Est. (BAH)

A veteran contracting firm established in 2003, specializing in high-voltage electrical substation installation, mechanical erection, and fabrication services.

## Aqualine Services Pvt. Ltd.

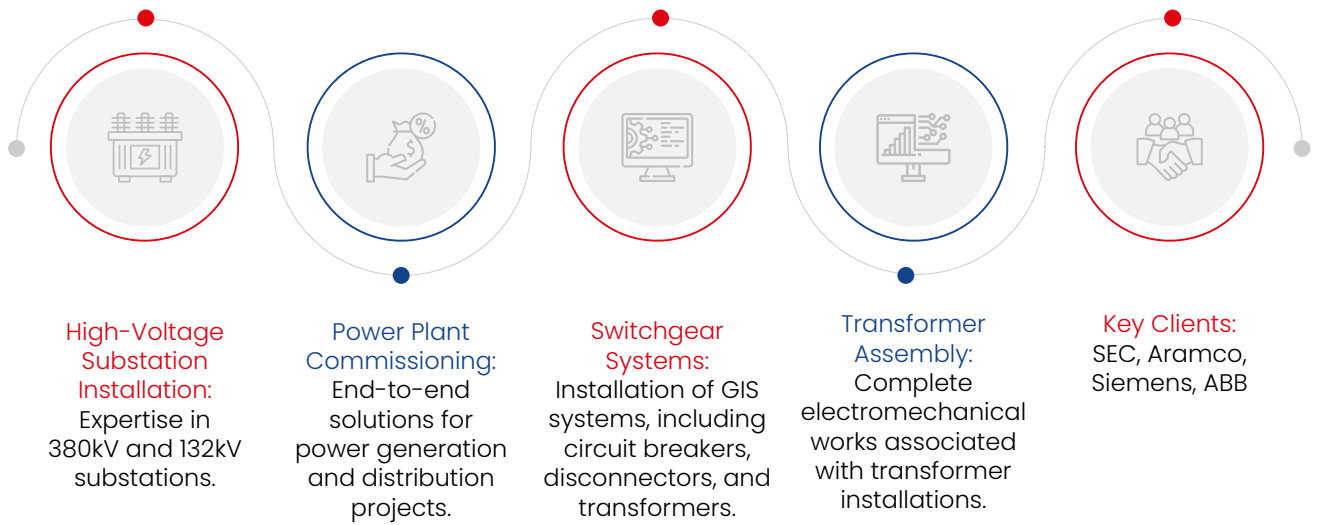

A leading water treatment company from Pakistan, offering advanced wastewater recycling and engineering solutions, including reverse osmosis, demineralization, and water softening systems.

# SCOPE OF SERVICES

## Electrical Contracting

In partnership with Bandar Abdul Hadi Al Shamri Contracting Est., we provide a full range of electrical services, including:

## Mechanical Contracting

Our mechanical division, supported by BAH's extensive experience, offers:

### Industrial Piping:

Carbon steel, HDPE, GRP, and PVC piping solutions.

### Fabrication:

On-site and workshop-based fabrication of steel structures, tanks, and silos.

### Equipment Installation:

Boilers, compressors, conveyors, and air handling units.

### Maintenance Services:

Comprehensive mechanical maintenance for industrial clients.

## Water Treatment Solutions

Through our partnership with Aqualine Services Pvt. Ltd., we deliver cutting-edge water treatment services:

### Effluent Treatment Plants (ETP):

Tailored solutions for industries like textile, pharmaceutical, and power plants.

### Reverse Osmosis Systems:

High-quality RO plants for industrial and municipal use.

### Demineralization and Water Softening:

Advanced systems for high-pressure boilers and industrial processes.

### Containerized Mobile Units:

Compact, efficient water treatment solutions for remote and emergency applications.

## EQUIPMENT & RESOURCES

We maintain a robust fleet and a skilled workforce to ensure timely and efficient project execution:

### Heavy Equipment

Mobile cranes, boom trucks, forklifts, and man lifts.

### Fabrication Workshop

Equipped with plasma cutting machines, rolling machines, welding towers, and hydraulic presses.

### Skilled Manpower

Experienced engineers, supervisors, and technicians across electrical, mechanical, and water treatment disciplines.

## HEALTH, SAFETY & QUALITY POLICY

We prioritize safety, quality, and environmental responsibility across all our operations:

- **Zero-Tolerance Safety Policy:** Ensuring accident-free workplaces through rigorous safety protocols.
- **Quality Assurance:** Compliance with international standards and continuous quality improvement.
- **Environmental Commitment:** Minimizing environmental impact through sustainable practices and waste management.

## RECYCLING PLANTS

# DuPont UltraFiltration (UF) System

Innovative Water Recycling Solution DuPont's UltraFiltration (UF) systems offer cutting-edge technology for water recycling, ensuring reliable performance and high-quality treated water. Designed with advanced Polyvinylidene Fluoride (PVDF) membranes, these systems provide robust solutions for industrial wastewater reuse.

### Key Features

#### Superior Membrane Technology

High durability and resistance to fouling, delivering consistent low turbidity (<0.1 NTU).

#### Efficient Design

Compact, modular structure suitable for new installations and retrofits.

#### Cost-Effective

Optimized CIP intervals and reduced chemical usage lower operational costs.

### Advantages at a Glance

- High recovery rates up to 95%.
- Consistent water quality for industrial reuse.
- Sustainable operation with minimized energy and chemical demands.

### Applications

- Industrial wastewater recycling.
- Pre Treatment for RO Systems
- Compliance with stringent environmental standards.

Flowing Towards a Cleaner, Greener Tomorrow.

## EXPERTISE IN

# WASTEWATER TREATMENT PLANT

Comprehensive Solutions for Water Management We specialize in delivering end-to-end services for wastewater treatment plants, including equipment supply, plant design, and consultancy.

## Key Services

### Equipment Supply

- Advanced treatment technologies: Clarifiers, aeration systems, membrane filtration, and more.
- High-quality chemical dosing systems for optimized process performance.

### Custom Plant Design

- Tailored designs for wastewater treatment and recycling.
- Integration of pre-treatment, biological treatment, and advanced polishing technologies.

### Consultancy Expertise

- Feasibility studies and site evaluations.
- Process optimization to enhance efficiency and reduce costs.
- Compliance advisory for regulatory and environmental standards

## Applications

- Industrial wastewater treatment and recycling.
- Municipal sewage treatment plants.
- Specialized solutions for high COD/BOD levels

## KEY PROJECTS & CLIENTS

Our partners' extensive portfolios reflect the depth of our collective expertise:

- **Electrical Projects:** Substations, power plants, and industrial installations for clients like SEC and Aramco.
- **Mechanical Projects:** Fabrication and installation for chemical plants, cement plants, and water treatment facilities.
- **Water Treatment Projects:** RO systems, effluent treatment plants, and mobile water solutions for diverse industries.

## ORGANIZATIONAL STRUCTURE

- **General Manager:** [Your Name]
- **Electrical Division:** Project Managers, Engineers, Supervisors, Technicians
- **Mechanical Division:** Fabrication Supervisors, Installers, Technicians
- **Water Treatment Division:** Project Coordinators, Engineers, Field Technicians
